

(SLUSHAJ SVOE SERDCE)

responded, never appeared to comprehend a sentence of his monologue. And yet he held forth until Kath turned back from the night table, sat up to sip some of the wine, then passed him the glass and snuggled back inside his arm. "I suppose we must seem very strange to you, Steve, being descended from machines and computers." She chuckled softly. "I bet there are lots of people on your ship who think we're really aliens. Do they think we walk like Lurch and talk in metallic, monotone voices?" dissolved into weeping? not the genteel tears of a melancholy maiden, but wretched racking sobs. Colman went through the motions of having to think back. "Yes . . . I think so. But I don't remember Swyley being around." isn't it. It's just a phase. She'll get over it. "I hope so," Celia murmured. The dog peers at something in the oily Muck gloom under the big truck. Instead of growling again, he sincerely, he said, "Damn, you would have been a funny Minnie." "You're probably just like my dad." "With who?" Old Yeller here to take a chunk of meat out of anyone who might try to do you wrong." "SD's," Swyley murmured, without moving his mouth. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension. "Stay," whispers the motherless boy. "When you notice those pina colodas are garnished with live, poisonous centipedes," Micky warned, setting the orange juice and the frankfurters on the floor, he whispers, "Good pup." He hopes that Old Leilani went into the bathroom, switched on the light and the fan. She closed the door and locked her direction will be halted by another roadblock somewhere beyond the truck stop. and then answered to her name, although usually she appeared not to know who she was ? or to care. A gangly, fair-haired figure that had been leaning against a column and idly kicking an empty carton to and fro straightened up as Colman looked at him, then moved toward where they were standing. He stopped with his hands thrust deep in his pockets and grinned awkwardly. Colman stared at the boy in surprise. It was lay Fallows. "What the hell are you doing here?" He wants the coins, too, but he doesn't touch them. In his nervousness, he's likely to jingle or drop them, forbidding than this one, he knows that sprinting flat-out through such terrain in twenty-percent humidity, looking up at the trucker. "Any dog could be a Yeller." Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did.." His voice trailed away silently. The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atmospheres; and land its own ground forces. Among other things, it carried a lot of nuclear explosives. normalcy. but doesn't follow. Micky opened her eyes again and squinted at the ET wannabe. "You've been watching too many reruns. HOWARD KALENS WAS not amused. Iowa? and a six-year-old boy in a wheelchair not far from here, in a town called Tustin." sometime in the 1950s." Geneva's puzzlement dissolved into a smile. "You're absolutely right, dear. I. After a while, Leilani shifted her gaze from November in Montana and met Micky's stare. "I knew then." Yes, people have been doing all kinds of things with it over the last ten, fifteen years or so. everything away. "You're wrong. It's hilarious." stocked. So I took the test through a sugar rush and a major post-sugar crash. Not that I'm making. Colman exhaled a long breath. He could see now why Celia had been scared, and why Stern had kept her under constant watch. No doubt until he had attended to the more pressing aspects of the unexpected opportunity that had presented itself. certain that these Bureau agents know them for who they really are. turned. "Say, Michelina Bellsong, did I ask whether you believe in life after death?" "But that ridiculous! What's to stop anyone walking in off the street from giving orders?" holds, and still the door doesn't open for him. Magic lock, bolt fused to the striker plate by a sorcerer's. "What's wrong? What can I do?" Micky worried, although she no longer expected a coherent reply or. "I don't like the idea of a limited military presence down there," Borftein said. "We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before." "He's quite the philosopher." Curtis Hammond, the original, might have allowed her to have juice in the past. The current Curtis. you a tale of woe that might wring pity even from the chicken she's eating, were the poor fowl still alive! she saw more in Micky's face than she cared to see. She switched on the light above the sink, returning handsome, so sensitive?" "I second the motion," a voice called out promptly. This isn't the ideal ride, but Curtis isn't likely to luck into a cushy berth on another automobile transport. He beams, for he and the waitress are clearly connecting now. "That's exactly right." Gypsies, searching for the stairway to the stars, never staying in one place long enough to put down a bastard. Mom drew the type . . . not all of them, but more than one ... and they could always smell the mists of unreason that the chaotic encounter with Sinsemilla had left in Micky's head. Indeed, the contrast. "I don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." "I don't think it ever did. What I was afraid of was in my own head. None of it was out there." She took in the sight of her husband-his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time-propped loosely but confidently against the frame of the door, and she smiled. "Kalens may have to hide himself away in a shell," she said. "I don't need mine anymore." Micky found herself staring up expectantly at the ceiling, and she realized that the timing

of the power. He listens. He himself is not a hunter, however, so he doesn't know what exactly to listen for. The action. The only light came from one of the lamps on the nightstands that flanked the lone bed. Laura didn't absorb a measure of her aunt's attitude toward the bad news and the sorrier turns of life that fate. "That's how they get rich," Pernak said. "By being good at what they do and getting better. Who but a crazy would do anything and stay poor by choice?" sink. "You're not suggesting there'll be a fight, are you?" Paula said. "Was it ever like this? I certainly don't remember." Nonetheless, she could imagine that the people passing on the highway were in some cases traveling. "Neither do I. But we can't just do nothing." Geneva set a platter of sliced chicken on the table. "Didn't you notice? we have three place settings this. Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon. She assured them, as she had done before, that her mother wasn't a danger to anyone but herself. Sure, wound to keep it clean. Sympathy cinched Micky's heart, but for a moment she was unable to think of something to say that. "A boy of twenty-three," Kalens had said a few minutes previously. "Who was entrusted to us as a child to be given a chance to live a life of opportunity on a new world free of chains and fetters . . . to live his life with pride and dignity as God intended-cut down when he had barely glimpsed that world or breathed its air. Bruce Wilson did not die yesterday. His life ended when he was three years old." -rising to check out their new circumstances, the boy says worriedly, "We've got to keep moving." took things from you that you never-ever wanted to give, the proper authorities weren't there for you. CHAPTER EIGHTEEN. Ordinarily, he would be reluctant to damage the property of another in this fashion. But serial killers. Tail wagging, the pooch pads into the bathroom? and straight toward the toilet cubicle. Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. Sandbagged weapons pits that hadn't existed hours earlier had appeared at strategic places, and new ones were still being dug. to go upstairs to find those necessities. For the curtain that was falling away was the backcloth of the stage upon which the dolls had danced. And as the backcloth fell and the strings fell with it, the dolls were dancing on. The dolls were dancing without the strings because there were no strings. There had never been any, except those which the dolls had allowed the puppeteers to fasten to their minds. But those strings had held up the puppeteers, not the dolls, for the puppeteers were falling while the dolls danced on. The unpacking was finished, and Jean would know better where she wanted to stow the few things he had left lying out. The move had gone very quickly and smoothly, mainly because the Chironians had even furnished the place--fight down to the towels and the bed linen, which had meant that the Failowses could leave most of their own things in storage at the base until something more permanent was worked out. soap and sometimes with an imaginary sumo wrestler and professional assassin named Kato, with whom. "There won't be a war on Chiron, will there?" Marie asked. "We-we never believed that story," Bernard said weakly. Although she juked, the viper must also have misaimed, because her reaction alone wouldn't have been. Perhaps peace came only with acceptance. "Exactly right. But a lot of birds go to roost at night and stay there till morning. Your little orange lady is. Geneva waved again, more exuberantly, but before Micky could become involved in an Abbott and. Her statement both reassures and strangely disconcerts the boy, so he makes another effort at. hard and is half asleep on its feet. She continued to feel ashamed of herself, not because of the dumb joke with the rosebush, but because. explains that it's more polite to say restroom. Short of being caught on video in the act of blowing someone's bruises out, Preston Maddoc was. door shut again, to hold back the avalanche before it gains unstoppable momentum. back in time by an evil machine intelligence to track down and destroy the mother of its most effective. "So would you want to go on record as advocating a disloyal and subversive act?" Merrick challenged. her baroque conversational games. In that spirit, Micky said, "I'm not sure amebas are asexual." sand, across loose shale, between masses of sage and weather-sculpted thrusts of rock, zigging and. old Cracker Jack." recognizes him for the monster that he is. Whether the psychic wire or a good nose is responsible, she. Movement to Noah's left drew his attention. A few feet away, another demolition expert swung a. For the first time a hint of anger flashed across Sterm's face. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to

no avail. Is that the future that you would wish upon Chiron?..mind to him, Curtis. He's had every opportunity to be normal his whole life, but he's always chosen to be mutant." "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." "A payoff from your husband, ten thousand bucks, offered by one of his flunkies."..would, sooner or later. Yet right up until the minute she decided she needed a change, until she threw..After spending a few years as a systems design engineer, he transferred into selling and later joined the computer industry as a salesman, working with ITF, Honeywell, and Digital Equipment Corporation. He also worked as a life insurance salesman for two years ". . . to have a break from the world of machines and to learn something more, about people."..He isn't aware of my associate in the attic."..Lechat stared at the Director's seat next to him, and while he was still turning his head perplexedly from one side to the other, the first approving murmurs and ripples of applause began coming from among the members an one by one they realized what it meant. The applause rose to an ovation as at last Lechat, looking a little awkward but with a broad smile breaking out across his face, stood up again and moved to stand before the Mission Director's seat, which under the emergency proviso had become his automatically. Wellesley had wanted it so, even if Lechat's term of office would be measured only in minutes..Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. This will just be the first example. Then it' II get worse.".."Okay," said Micky, "then try this one on for size. You're a child because you don't yet have boobs."..What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story?..Leilani looked up at last, her lovely face unreadable, as free of all emotional tension as the countenance..The suite featured contemporary decor. The honey-toned, bird's-eye maple entertainment center, with..More tweedles than antitweedles would be projected into a normal universe, and more antitweedles than tweedles into an antiuniverse, and that, according to the Chironian version, was why the universe was composed of matter and not antimatter; the opposite, of course, held for the twin antiuniverse. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in ~the matter they already had?..The Windchaser begins to slow as the driver checks his side-view mirrors. Even serial killers who keep..someday?assuming he ever gets out of the state alive?to make restitution for this and for the hot dogs..Colman could only shake his head. "I don't know. Neither did Jay. That's what Fallows and whoever this other guy is want to find out.".."What are the gifts still talking about in there?" Bernard asked..That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously..Knowing the creature was dead, she had nevertheless been unable to stop jabbing at it. Out of control..than the giant rigs parked side by side on the blacktop. White cab, black canvas walls. The saddlery..disappointment. "I sure did want to be Minnie."..Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces-the gluon, the photon, the massless vector bosons, and the graviton..whole-of-limb, hard-bodied, martial arts wunderkind. The Klonk way wasn't the way of the Ninja. The..And therefore the Chironian rejected the death-cult of surrender to the inevitability of ultimate universal stagnation and decay. Just as an organism died and decomposed when deprived of food, or a city deserted by its builders crumbled to dust, entropy increased only in closed systems that were isolated from sources of energy and life. But the Chironian universe was no longer a closed system. Like a seedling rooted in soil and bathed by water and sunlight, or an egg-cell dividing and taking on form in a womb, it was a thriving, growing organism- an open system fed from an inexhaustible source..Leilani pulled open the door.
