The silent 1924 Thief, with Douglas Fairbanks, looks pretty primitive in places but also has some special effects that can still awe. Alexander Korda's 1940 Thief doubles that in spades (the giant flying genie is just one of many), plus it has monumentally lavish sets. Even the Steve Reeves version seems to have been made with more care and wit than the rest of Mr. Reeves' spaghetti spectacles, containing some good film magic of its own and a resounding score with one of those epic romantic themes (based, it must be said, on a theme from the Rozsa music for Korda)..Ike and I were on picket duty when we heard that the latest bargaining session had gone Pffft! No sane attacking force would contemplate taking an objective like that by a direct frontal assault in the center--the lowermost stretch of the trail was too well covered by overlooking slopes, and there would be no way back if the attack bogged down. That was what the enemy commander would have thought anyone would have thought. So what would be the point of tying up lots of men to defend a point that would never be attacked? According to the book, the correct way to attack the bunker would be along the stream from above or by crossing the stream below and coming down from the spur on the far side. So the other side was concentrating at points above both of the obvious assault routes and setting themselves up to ambush whichever attack should materialize.
