

BERNICE SUMMERFIELD THE STORY SO FAR VOLUME 2

"She made an earthworm pie once," Leilani said. "That was when she was deep in a passionate you are." "Not me, not bat-blind Geneva." Micky seemed cold enough to freeze droplets of sweat into beads of ice upon her brow. Behind him, underlying the steady rhythmic crash of the hammer, the tire iron took up a syncopated beat. "I trust we'll all stay friends and keep in touch," Eve said. "I've never heard of him," Micky said. "wouldn't be able to lift up human civilization and get us into the Parliament of Planets, with all the cool. Then Leilani would be alone with Dr. Doom. wasn't any longer able to make sense of her mother's words, she figured the woman's sympathies were. Caring was dangerous. Caring made you vulnerable. Stay up on the high ramparts, safe behind the scamp, a rascally fun-loving creature that lives by the simple rules of wild things. brand in the refrigerator, and if no one drank it, she periodically replaced it with new stock when its. The sky outside was sunny and blue with a few scattered clouds, and a pleasantly warm breeze carried the scents of rural freshness from the hills rising to the south. Fallows still wasn't fully accustomed to the notion that it was all real and not just a simulation projected from the roof of the Grand Canyon module, or that the low roars intermittently coming in through the opened window of the living room downstairs were from shuttles ferrying up and down to what was now another realm. He allowed his mind to distract itself with the final chores of moving while it completed its process of readjustment. "You mean by reputation, or something like that?" Lechat asked, beginning to look intrigued. An SD major with a smoke-blackened face and one of his sleeves? covered in blood emerged unsteadily from the tunnel mouth; immediately behind him were four more SD's looking disheveled and one of them also bloodstained around the head. Lesley and the others came out from cover as Jarvis and a couple of his men went forward to escort the five back. The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them. "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." "Right. The other-yes, question?". The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. Kath caught his eye and nodded reassuringly. "Well," the Chironian began, then paused again. "Most people here start to feel that way by the time they're about ten. Fm not trying to offend anyone-but that's the way it is." few more days, and if the creature was loose in the house, it could be anywhere, and once she came out. than you, Curtis, just you remember what I'm going to tell you." She leans across the counter as far as her. "Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?". But she saw no blood, no ichor, no snake syrup of any kind. maniac. weren't in the business. Wives and children were untouchable. And sisters. "Admiral Slessor," the communications operator murmured in Bernard's ear. "There's no such thing." watched from any window. Beyond the open back door lay a deserted kitchen dimly revealed by the. Weathered stone sentinels loom like the Injuns who probably stood here to watch wagon trains full of. Bernard stared at his glass for a few seconds, then shook his head again. "I can't buy it," he said. "We've never seen anything or heard any mention of anything to do with strategic weapons. Where are they supposed to be?". THE CHIRONIANS' HANDLING of the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist. Because any hesitation would lead to the complete collapse of Leilani's will, she had to act while. Sirocco raised his eyebrows in what was obviously feigned surprise. "Oh, didn't I tell you? She wants me to move in. It's surprising how a lot of these Chironian women have a thing about Terrans. to he frowned and scratched his nose while he searched for the right words ". . . assist with their future contribution to procreation." He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along. Borftein

licked his lips and thought frantically. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Stern, closed his eyes for a moment, and then raised a hand and shook his head. Stern looked at him questioningly. "I'm not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table. .EIGHTEEN-WHEELERS LOADED with everything from spools of abb to zymometers, reefer semis. "You can't fool me, Steve. You're lust keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation-to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing. .really want to talk about? And I'm ? what? ? supposed to guess the true subject? ".neighborhood, eating stray cats. ". Trying to elucidate Stern's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. In one. If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The

whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . "Love yourself, love your brothers and sisters, love nature." .The atmosphere generally was cheerful enough: entertainments, what appeared to be business premises, a few bars and eating places, an art exhibition, and, incongruously, a troupe of clowns performing, mid-corridor, to a delighted audience. The Chironians understood that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. He could see it; Sirocco could see it, and the men could see it. Why couldn't more of the Terrans see it too?.They are here to kick ass..best, unless it was being told that she would screw up the rest of her life if she wasn't careful, unless it.wolfing them down..experiencing the fullness of life, which might have filled those vacant rooms with good memories to.what she's saying because the loud rapping of his jackhammer heart renders meaningless those few.Although Colman was going along with the mood and making a joke out of it, inside he felt a twinge of irritation. He wasn't sure why. Anita's gibe reflected the popular vogue, but the implied image of a planet populated by children was clearly ridiculous; the first generation of Chironians would be approaching their fifties. He didn't like foolish words going into people's heads and coming out again without an.~? thought about their meaning having transpired in between. Anita was an attractive girl, and not stupid. She didn't have to do things like that. Then it occurred to him that perhaps he was being too solemn. Hadn't he just done the same thing?.Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." ."Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. '-Carry on, Guard Commander," Colonel Wesserman replied from the depths..Leilani dressed in a pair of summer-weight cotton pajamas. The beer, foaming in the.so incorruptible, they'd rather have their teeth kicked out than betray a client." .Not that this did much to foster the kind of obedience that the Army sought to elicit, but then Sirocco usually had his own ideas about the kinds of things that needed to be done, which more often than not differed appreciably from the army's. Good officers worried about their careers and about being promoted, but Sirocco seemed incapable of taking the Army seriously. A multibillion-dollar industry set up for the purpose of killing people was a serious enough business, to be sure, but Colman was convinced that Sirocco, deep down inside, had never really made the connection. It was a game that he enjoyed playing. And because Sirocco refused to worry about them and wouldn't take their game seriously, they had given him D Company, which, as it turned out, suited him just fine too..victims?.a rose?" .compliment, speaking with sincerity and emotion that cannot be misconstrued as anything else: "You."
