Merrick was fight, he had decided. He had been a fool. He didn't owe it to the likes of Colman to put up with going through the mill like that or having his own integrity questioned. He didn't owe it to any of them to help them unscramble their messed-up lives.."They never had any parents of peers for that kind of stuff to rub off from," Pernak agreed. "Classes, echelons, black, white, Soviet, Chinese ... it's all the same to them. They don't care. It's what you are that matters."..first-aid kit from her dresser and returned to her mother's room..When Micky rose to clear away the dinner dishes, Leilani pushed her chair back from the table and.Rastus looked puzzled. "There's a whole galaxy out there, and a few billion more beyond that," he said. "It'll take a long time for it to get crowded. Europe used to run on wood and that was finite, but nobody worries about it today because they're into smarter things." He shrugged. "It's the same with everything else. The human mind is an infinite resource, and that's all you need."..First the helicopter tracking the highway toward Nevada and now this patrol car following: These are.From where he was sitting with Bernard, Colman looked over at Kath, who was standing near the center of the room. "You have to be involved with them somehow, even if it's only indirectly," he said. "You must know these people, even if you're not one of them yourself."..and then even more solid, a whoosh and a thump combined, as a blade might sound if it could slice off.An SD major with a smoke-blackened face and one of his sleeves? covered in blood emerged unsteadily from the tunnel mouth; immediately behind him were four more SD's looking disheveled and one of them also bloodstained around the head. Lesley and the others came out from cover as Jarvis and a couple of his men went forward to escort the five back..Considering that this had just now become incontestably clear to Constance, her composure was."I've got more than enough to destroy Jonathan without this. He follows.Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin..purchased their residences, too."..as heartworm, but I guess it's a perfectly respectable parasite. Here in back, a strip of..Inside, the technicians and other staff were still recovering from being invaded by armed troops and the even greater shock of seeing Wellesley, Celia Kalens, and Paul Lechat with them. They stood uncertainly among the gleaming equipment cubicles and consoles while the soldiers swiftly took up positions to cover the interior. Then Wellesley moved to the middle of the control-room floor and looked around. "Who is in charge here?" he demanded. His voice was firmer and more assured than many had heard it for a long time.."No," Micky said. "Cops haven't had one lead in eighteen years."..Kath gave a short laugh, "Of course not ... but they're deceptive, aren't they. You have to remember that they've evolved from systems which were designed to adapt themselves to, and teach, children. You project a lot of yourself into what you think they're saying."..In the gloom, the boy loses track of the money. He's focused intently on the cowboy boots..Two, three, five men burst past the front of the parallel SUVs, a formidable pack of husky specimens, all.CHAPTER TWENTY-ONE.Two hundred thousand miles away on the rugged, pockmarked surface of Chiron's other moon, Romulus, two enormous covers, whose outer surfaces matched the surrounding terrain, swung slowly aside to uncover the mouth of a two-hundred-foot-diameter shaft extending two miles vertically through the solid rock. The battery of accelerator rings in the chambers surrounding the base of the shaft was already charged with dense antimatter streams circulating at almost the speed of light.."I find them a refreshingly honest and direct people. You know where you stand with them." Bernard gave a slight shrug. "In view of the short time we've been here, I think everything has gone surprisingly well. Certainly it could have been a lot worse."..Lechat had digested the implications by now and appeared worried. "Maybe the Chironians have given a warning, but nobody realized it. They might already have said that they're almost down to their last option.".."I might just do that," Fallows said, nodding slowly. "Yeah I could use being out and about for a few

hours. Thanks for the tip." It wasn't a moment to be keeping up pretenses. Colman's frown deepened. "What about her? Is she okay?" Old Sinsemilla would do in a similar situation. In any predicament whatsoever, if Leilani wondered which. On the roof of the SUV, a searchlight suddenly blazes, so powerful and so tightly focused that it appears. Maybe, he thought to himself, at the end of it all, the myopic would inherit the Earth. The eyebrows of Stern's regal, Roman-emperor's face raised themselves in approval. "I see the subject is not unfamiliar to you. My compliments. Regrettably, rareness of quality is not confined to grapes." Curtis can't see any lights in the sky that nature didn't put there, but the helicopter is growing louder by. The bright, sharp memory of that violence would shred his sanity if he dwelt on it. For the sake of. Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" scoffed derisively. "He still thinks it's for playing with." "I'm just telling you what the guy said." "Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved. His confidence is restored. backyard fence. But if you do run into him, don't call him Preston or Maddoc. These days he looks a lot. "We've only seen Franklin," Pernak replied. "When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest. grass that shimmers out there beyond the trees. Driscoll grinned and began feeling more confident. "You see, Wellington," he said. "They're not all as bad as you think." "Does Casey know?" Colman asked. Veronica shook her head. Colman thought for a few seconds. "I don't like the sound of what's going on around there," he said. "Do you know the bridge outside, the base on the south side-where the maglev tube crosses a small gully by the distribution substation?" "Ah. Then I'm not embarrassed, just slightly sickened. Why don't you get a glass of cold lemonade." "We're not negotiating, Sherlock." haloed by red lamplight, glittery-eyed with excitement. "Thingy, him a hard-ass stubborn little crawly." Tanks filled, the transport pulls away from the pumps, but the driver doesn't return to the interstate. "And how about this?" Pernak said. "Sal says the university's crying out for somebody with a background in nonlinear phase-space dynamics and particle theory. She as good as said I could get a job there, and that a job like that pays tops around here. What do you think of that for a break?" On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Cominunications Center, praying that the alarm hadn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby. miracle. sang." "Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes." .change the subject. More than live feet high. Four feet. Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea." .visiting from Beyond. Pale and willowy, the woman spun and swooned and jerked erect and spun again. .Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room. .four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth--the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning. .Aunt Gen used a paper napkin to blot her brow. "Don't flatter yourself that I'm sweating with guilt. It's. as a quiver of light. .The Two Moons occupied one end of the basement and ground-floor levels of a centrally located confusion of buildings facing the maglev terminal complex across a deep and narrow court, and had a book arcade above, which turned into .residential units higher up. It comprised one large bar below sidewalk level, where floor shows were staged most nights, and two smaller, quieter ones above. Kath suggested one of the smaller bars and Colman agreed, permitting himself for the first time the thought. that a pleasantly romantic interlude might develop, though why he should be so lucky was something he was far from comprehending. Jonathan's hands slid from Karla's shoulders to her breasts. Soon he was. Wellesley raised a hand a fraction. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Sterm, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. , "Yes, Matt?" The others looked toward Sterm curiously. . "What do you do best?" Ci asked him. "I mean . . . apart from holding people's walls up for them. That can't be much of a life. " . "Would it worry anyone if I smoked?" . lattice-shaded sidewalks draped with yellow and purple bougainvillea. In spite of those inviting arbors, no. "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that. " . side in the midst of warfare, after all. "You can use a gun, . can't you, Jay?" Murphy asked. "Well, yes, but. . Turning, he sees lights steady in every window of the house, and he knows that the killers are. The display of tact seemed to do the trick. The Chironian held his eye for a moment longer, and then nodded. "Very well." Inwardly Colman breathed a sigh of relief. The women were evidently willing to allow the man to speak for them too. They exchanged quick, barely perceptible nods, stood up, and gathered their possessions. Two of the SD troopers moved to assist them with a show of respect that Colman found surprising. . task is to stop any SD's getting out and, more important, to stop Sterm and his people from getting in if things go well and they realize they can't hold the rest of the ship. What we have to prevent at all costs is Sterm and Stormbel get/ ting in there and detaching the module so that it

can threaten the rest of the Mayflower II as well as the planet. She brightened. "Hey, you probably got something there." Then her sigh vented volumes of. Lechat nodded. "That was already understood," he replied grimly. Smiling, reaching down to stroke the lovely lady's head, the trucker says, "I guess you'll be all right with. Chapter 16
