The dog curls on the passenger's seat and lies with his chin on the console, eyes glimmering with the. "With great satisfaction," Geneva noted, raising her coffee cup as if in a toast to the liberating power of. The specificity of the answer was disconcerting. Leilani's words struck a bell in Micky's mind, and she. The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." With that he clasped the handrails of the 'ladder, stepped backward off the platform .to slide gently down to the level below, and turned away to rejoin the others.. "Oh, yes. I should have thought of that." Lurch about-faced and lurched back to the kitchen. The sound of a door. The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into t. he sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was knows as the Mandel Peninsula, after a well-known statesman of the 2010s. It ~ was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship.. "No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. Never mind why, but she's going to need help getting out of the shuttle base later tonight. What do you think?" .A few yards away from them, Corporal Swley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..welcoming than the baleful fire in a menacing jack-o'-lantern. The draperies were shut tight, and no one. Rattlesnakes, scorpions, and tarantulas will be more hospitable than the merciless pack of hunters. They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight . Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox..haloed by red lamplight, glittery-eyed with excitement. "Thingy, him a hard-ass stubborn little crawly. Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm..These are not rich people, and he feels guilty about taking their money. "That's not going to change. If you're going to act dumb, you can do that anywhere." To Bernard's mild surprise Jay had shown a lively interest in the conversation all through dinner and had elected to sit in afterward. About time too, Bernard thought to himself..She hadn't cried since childhood. Let's leave it with all the other stuff that's best left .up there." The mention of antimatter reminded Colman of something. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked..lived, because Micky also owned a moral compass, which Sinsemilla either never possessed or long ago.people are homicidal tooth fetishists..saliva, and he swallows hard to keep from drooling..burning eternal. "A real pro burglar Terry exclaimed. "You son-of-a-gun." Hanlon said admiringly..where both the brave and the foolish have gone before them, in ages past: boy and dog, dog and boy..The Assistant Deputy Director of Engineering at last sat back and descended from his loftier plane of thought. "Ah, yes, Fallows." He gestured toward the screen he had been studying. "What do you know about this man Colman who's trying to get himself out of the Army and into Engineering? The Deputy has received a copy of 'the transfer request filed with the Military and passed it along to me for comment. It seems that this Colman has given your name as a reference. What do you know about him?" The inclined chin and the narrowing of the Gothic eyebrows were asking silently why any self-respecting echelon-four engineering officer would associate with an infantry sergeant.."I'm not in fourth grade," Leilani said, pouring the warm beer into the sink. "We're twenty-first-century.. but then diminishes and fades entirely away..Hunted and the Would-Be Chameleon. This isn't a published work, of course, although in the boy's mind, Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon.."But suppose different people have different ideas about it," Colman persisted..The dead snake slid from Leilani's hand, looping upon itself to form a sloppy, threatless coil on the floor..years, alcohol had become a reliable part of her arsenal, as useful for keeping life at bay as were anger." "After twenty years on the same ship? That's not possible, surely." "Lock at condition orange and ready to close." If they beamed a signal up spelling out just what their weapons can do, whatever they are, and with the evidence to prove it, Sterm would have to take notice of that, surely."..Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested..midpoint of the hall. They stare at him, and he returns their stares..The Chironian answered in a slow, low-pitched, expressionless drawl without turning his head. "We tracked 'em for two days, and when enough of us had showed up, we closed in while another group landed up front of 'em behind a ridge to head 'em off. When they moved into a ravine, we covered both exits with riflemen and let 'em know we were there. Gave 'em every chance . said if they came on out quiet, all we'd do was turn 'em in." The Chironian inclined his head briefly and sighed. "Guess some people never learn when to quit." "That's so true," Eve agreed.."Well-meaning but useless," Leilani interrupted. She seemed to be speaking from experience. "Anyway,." Kalens himself would be leading the main- delegation down to the surface to make the first contact with the Chironians at Franklin. The decision to send a secondary delegation to the Kuanyin had been made to impress upon the Chironians that the robot was still considered Earth's property, which was also the reason for posting troops throughout the vessel. As a point of protocol,

Wellesley and Sterm would not become involved until the appropriate contacts on Chiron had been established and the agenda for further discussion suitably prepared..I thought you might need a hand with these so I did them last night. Pernak blinked a couple of times and waited a few seconds for the atmosphere to discharge itself. "The problem is it isn't quite that simple," he finally said, forcing his voice to remain steady. "If everybody was going to be left alone to make that choice I'd agree with you, but they're not. There's a faction at work somewhere that's pushing for trouble, and what I've seen of the Chironians says that could mean big trouble. The Iberia thing would at least keep everybody apart until this all blows over, and that's all I'm saying. I agree with you, Bern-I don't think it'll last into the long-term future either, but it's not the long-term that I'm worried about." He glanced at Jean apologetically. "Sorry, but that's how I think it'll go.."why are you painting it?" he asked. "Because it needs painting."..So how did people like Howard Kalens feel about Chiron? Colman wondered. Did they think they could possess a whole planet? Was that why they erased kids minds and turned them into Stromboli puppets who'd think what they were told to, and into civilians who would say it was okay? But why did the people let them do it? Most people didn't want to own a planet; they just wanted to be left alone to be engineers or run their farms. Because they played along with the rules that said they were."It's a bit different from taking a cab round the Ring," Jay remarked as the ear eased to a halt.."I never said there was," Nanook answered..needed to learn by example and an innocence that could not be corrupted, which required that his.Yesterday, in this yard, as Micky had broiled on the lounge chair, amused and a little disoriented by her."What happens if you win the right way?" Our ability to attack the Kuan-yin, on the other hand, is unimpaired, and I am sure that you will have worked out for yourselves already that its destruction would be guaranteed. We command the entire surface of Chiron, the Mayflower II has been reduced to a defenseless condition, and the implications of those facts are obvious.."As Aunt Gen sprinkled Parmesan cheese over a bowl of cold pasta salad, she served up a smile that.threatening that her keener senses can detect..Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion-armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislaw, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle..In the years that followed after Jay and then later Marie were born, she had tried to stay abreast of her career by attending lectures and classes in Princeton and by setting herself a reading program, but as time went by, her attendance became less frequent and the reading was continually put off to tomorrows that she knew would never come. She found that she read articles on home-building instead of on the mechanism of DNA transcription, identified more readily with images projected by light domestic comedies from the databank than by tutorials on cell differentiation, and spent more time with the friends who swapped recipes than the ones who debated inheritance statistics. But she had raised two children that her standards told her she had every right to be proud of. She was entitled to rewards for the sacrifices she had made. And now Chiron was threatening to steal the rewards away.."I live in a hooey-free zone.."You can say that again," Bernard agreed..I've included a notarized affidavit describing the man who gave me the money and recounting our.The tailgate is hinged at the bottom. "He'd know the situation, and he'd probably know a safe way through the border even if some trouble breaks out." He began nodding more strongly. "And we certainly know we can trust him"..cruising at sixty miles per hour..Curtis, and my dad sent me in for some grub to go"..Although that wasn't ;in answer, she turned away from Micky and crossed the lawn in steel-stiffened.Well, all right, the clown car is wishful thinking, as they

Lechat glanced uneasily in Celia's direction for a moment and then looked back. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." He looked at Jay. "I can't see that they've got it all figured out. They can't have." A flux of light throbs through the air beyond the ridge line: the moving searchlight beams reflecting off the black sky and the black land meet, where the sharper facets of quartz-rich rocks reflect the glitter of. The Kuan-yin had changed appreciably from the form shown in the pictures he had seen of the craft that had departed from Earth in 2020, Colman noted, with interest as he sat erect to preserve the creases of his uniform beneath the restraining belt holding him to his seat and watched the image growing on the wall screen at the forward end of the cabin. The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared. Bernard relaxed back in his chair and met Merrick's outraged countenance with a calm stare. "Nobody's going to shut that complex down, and you know it," he said. "Save the propaganda. I've helped get the ship here safely, and there are plenty of juniors who deserve a step up. I've done my job. I'm quitting." murderous rampage. Maybe they'll beam me up before my. "We never said it was," Kath replied. "You assumed it. So did Sterm." Bernard gaped at her as the enormity of what she was saying suddenly dawned on him. Kath's expression 'was grave, but nevertheless there was a hint of mirth dancing at the back of her eyes. "We could hardly disguise our scientific work," she said. "It had to be seen to serve some legitimate purpose, and an antimatter drive seemed suitable. But the Kuan-yin project has been low down on our list of priorities." In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and 'therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along. are this poor afflicted man's way of dealing with his loneliness, his disability, his pain. "I'm sorry, sir."
