Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. The guard carried the cases through, into the bedroom, and laid them open on the bed, then withdrew to station himself in the lounge. While Celia began selecting and packing items from the drawers and closets, the matron went to the door at the back to look into the bathroom, swept her eyes round in a perfunctory check for windows or other exits, and then came away again to assume a blank-faced, postlike stance inside the lounge door, moving only when Celia went through to collect some papers and other items from the desk beyond. Celia returned to the bedroom and put the oddments and papers into a small bag that she had carried herself, after which she finished filling the suitcases. Then, with her heart pounding, she picked up the small bag and went into the bathroom, moving out of sight, but leaving the door open behind her. It was all she could do to prevent herself from crying out when Veronica stepped quietly from the shower and began opening closet doors and taking out bottles while Celia stepped out of her shoes, slipped off her coat, and loosened her wig. There was no time for smiles or reassuring gestures. Veronica put Celia's shoes on her feet and the flight-.Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron..Bernard hadn't really thought of that. He saw Jay nodding vigorously, and tossed up his hands. "Why not? :If. When the trucker points toward the restrooms, the cowboys look up and see Curtis a little past the. With haste, he passes among them..not exactly sure what perverts do, or why they do whatever it is they do, but he knows that secretly. "Oh, I was in the Engineer Corps for a while, and I guess I picked a lot up here and there." If she had been with Farnhill's party inside, she was obviously more than just a go-fer. Why in hell did she come out to the parking lot to be nice to the troops?. Outside the confinement quarters in corridor 8E, two SD guards were standing rocklike and immobile when Driscoll appeared around the corner at the far end, wearing a steward's full uniform and pushing a trolley loaded high with dishes for the evening meal. Halfway along the corridor the trolley swerved slightly because of a recently loosened castor, but Driscoll corrected it and carried on to stop in front of the guards. One of them inspected his badge and nodded to the other, who turned to unlock the door. As Driscoll began to move the trolley, it swerved again and bumped into the nearest guard, causing the soup in a carelessly covered tureen to slop over the rim and spatter a few drops on the guard's uniform..Or maybe not. "How do you know there's no one around?". Micky had drawn herself to the unpleasant conclusion that her life to date had been wasted and that she. "We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?". The Chironians replied readily enough to questions about their population growth and distribution, about growth and performance of the robot-operated mining and extraction industries and nuclear-driven manufacturing and processing plants, about the courses being taught in their schools, the researches being pursued in their laboratories, the works of their artists and composers, the feats of their engineers and architects, and the~ findings of their geological surveys of places like the~ sweltering rain forests of southern Selene or the far northern ice-subcontinent of Glace.. "It could still detach, even without Sterm". "I see . . ." Wellesley frowned and nibbled off a piece of the toast.. "I don't know yet. We haven't heard anything.". "Maybe I was stupid because I wanted to be stupid.". Now, from moonlight into darkling forest once more. The meadow behind him. The tangled maze of. Funny had better be sad somewhere..Leilani didn't actually make sense of those words, and she was saved only because

she met her mother's in the dark, waiting for him to find them. Surprise..Celia smiled over her glass. "Thank you. It's rare to find such appreciation." "What's wrong? What can I do?" Micky worried, although she no longer expected a coherent reply or. "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. Whoever did it knew what they were doing." "Well, he must have been there somewhere, mustn't he?".Before him, past this final line of trees, the meadow waits. Waits. Too bright under the fat moon..Veronica nodded her head quickly a couple of times. "She's not hurt or anything like that, but she's in a lot, of trouble. She's gotten herself mixed up with Sterm, and she can't make a move without being watched. She could be in real danger, Steve. She has to get away from there." Yuck. This was going to be worse than blood and mutilation..truly happy, anywhere, anytime. Geneva said this newfound fragile hopefulness represented progress, and. "But she sure does give the man major class and respectability. Now you go out there and do the right.It was the right thing to do. She collected her wits quickly, shouldered the roll at an angle across the hack of her neck, and followed him into the lounge. Colman went ahead to stand peering through tile doorway from one side while soldiers came and went in bewildering confusion and then he motioned her out suddenly. In a strangely dreamlike way she found herself being conveyed down. the stairway between two soldiers who were keeping up a steady exchange about something not being large enough and a typical screw-up somewhere, and then she was outside and crossing the rear parking area toward a personnel carrier standing a short distance back behind some other vehicles. Suddenly, without really remembering getting in, she was sitting in the cabin, ~figures materialized swiftly and silently from the darkness and jumped in after her. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before.".Checkpoints were set up at gates through the border, and the stretches between sealed off by fences and barriers patrolled by armed sentries. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway..but the whole strange story is out there if you want to look it up. He has."Evidently so. I think I'll buy me a girl cat and call her Mr. Rover."..Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Make sure that all the sky-roof outer shutters are closed immediately."..Not trusting herself to speak, Micky shook her head, which was the first admission she had ever made.Wellesley looked at Slessor, who, while still showing. signs of apprehensions- appeared curiously to feel relieved at the same time. Wellesley nodded heavily. "Very well. Proceed on that basis, John. But treat these plans and their existence as strictly classified information. Restrict them to the SD troops as much as

you can, and involve the regular units only where you must." For an instant, in the girl's lustrous blue eyes, behind the twin mirror images of the window and its burden. Face. Eyes. So much to lose. Get out. Leave. But they'd bring her back. And where would the snake be
