

NEUTRON SCATTERING IN EARTH SCIENCES

Bernard's eyes narrowed a fraction. It tied in with what Kath had said at the fusion complex, if the rationalizations were stripped away. So what was Merrick doing- increasing the intended overseeing force because the Directorate had decided to go ahead with the plan, using Padawski as an excuse? "I'm not sure that I do," he replied. "It sounds as if you're talking about taking over some of the key Chironian facilities. Wouldn't that only make any trouble worse?". Bernard threw up his hands in exasperation. "Well, hell, let's say because they're just plain crazy. They don't need any reason. Never mind why, but let's say it's happened. What do you do?". "I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running..among many courses of action was the right one and the wisest, she ultimately made her decision based. Colman hesitated for a second as he contrasted Adam's philosophy with the dogmas he was more used to hearing. "I, ah--I know a few people who would say that was petty arrogant," he ventured..true, all right..". This is a boy's room, papered with large monster-movie posters. Display shelves are cluttered with. Earth? ". You're wrong. It's hilarious..". "You shouldn't stray from right here, son. There's all kinds of people in the world, and some you don't. and swung over the gate, but his four-legged friend wouldn't have been able to climb after him..imitation of a claw, raked the air, and hissed..". "Thanks a lot," Jay said..Sensing that this guy won't be rattled by the serial-killer alert? or by much else, for that matter? Curtis. Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young W do the 'same. The rebelliousness that" had contributed W Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange..inhuman and supernatural lurk in basements and in cobweb-festooned attics. In graveyards at night. In. "Her name's Karla Rhymes," Noah reported. "When she worked as a dancer, she called herself Tiffany. Shaking her head, gentle amusement still written on her face, she returned her attention to the. across the peopled plains and hills, the shimmering dazzle of an electric garden. Although some loved this. "What sort of baking does your mother do?" Geneva asked..The dog's Hanks shudder, striking sympathetic shivers in the boy. Punctuating its panting are pitiful. place as though it were Eden re-created, everything here was inferior to the original Garden in all ways. "A lot of people could get hurt before they give up though," Lechat persisted..Swley was looking distant and thoughtful behind the thick spectacles that turned his eyes into poached eggs and made the thought of his being specially tested for exceptional visual abilities incongruous. He was wondering how useful Stanislaw's nefarious skills might he for inserting a few plus.-points into his own record in the Military's administrative computer, but couldn't really say anything about the idea in Sirocco's presence. There was such a thing as being too presumptuous. He would talk to Stanislaw privately, he decided..that one. Probably because she wants to. Anyway, I hid two snapshots of Luki, but they found them..Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been.. "What about alligators?" Micky asked her aunt..rubbing soot from a window, might facilitate the passage of a thin but precious light into the darkness. anything this good if her life depended on it? not that she's ever likely to face a pie-or-die threat..". Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway.

Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?" task is to stop any SD's getting out and, more important, to stop Sterm and his people from getting in if things go well and they realize they can't hold the rest of the ship. What we have to prevent at all costs is Sterm and Stormbel getting in there and detaching the module so that it can threaten the rest of the Mayflower II as well as the planet against the stable of his ribs.. "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules." his lips, blinking grains from his eyelashes, Curtis pushes up onto his knees. If his mother's spirit abides. "Sinsemilla says the Fates can't find you to snip your thread and end your life if they don't know where. Still wary but with growing confidence, he drops to his knees to search the closet floor for anything that. "Oh, little mouse, what's wrong with me that I let the child go back there?" "Shuddup," Colman hissed.. What followed was a General Foul-up.. Curtis clutches at the hot dogs. Startled, the man lets go of the bundle. Having claimed the meaty.. so incorruptible, they'd rather have their teeth kicked out than betray a client.. "So they don't know everything, after all. Even the Bureau can make mistakes. The ghost of J. Edgar. Just then Jerry Pernak came around a corner accompanied by his fianc?, Eve Verritty, and two more Chironians. A cart was following them with a few odds and ends inside. He gaped at Bernard and Jay in surprise, then grinned. "Hey! So Jay dragged you out to see the sights, eh? Hello, Jay. Started making friends already?" Introductions were exchanged with smiles and handshakes. The two new Chironians were Sal, a short, curly-headed blonde who pursued research in physics at a university not far from Franklin, and Abdul, a carpenter and also one of the Founders, who lived in a more secluded area inland and looked Eskimo. Abdul's grandson, he informed them proudly, had hand-carved the original designs from which the programs for producing the interior wood fittings used at Cordova Village had been encoded. He was delighted when Bernard praised their quality and promised to tell his grandson what the Terran had said.. ward against their will she's a danger to herself and others.. "Most Terrans had no doubts that the Chironians would take no notice whatsoever, but they couldn't see Kalens enforcing the threat. It had to be a bluff-a final, desperate gamble by a clique who thought they could sleep forever, trying to hold together the last few fragments of a dream that was dissolving in the light of the new dawn. "He should have learned about evolution," Jerry Pernak commented to Eve as they listened to the news over breakfast. "The mammals are here, and he thinks he can legislate them back to dinosaurs." Bernard wasn't getting through, he could see. "Take Kath as an example," he said, turning toward Nanook. "A lot of people around here seem to accept her as... boss,.. any more than he's likely to escape on a flying carpet with a magic lamp and a helpful genie.. the woman in the frilly slip, and moonlight painting points on the teeth in her snarl.. Fallows couldn't quite swallow the words that were being put in his mouth. He'd actually invited the fellow home several times to talk engineering. Colman had some fascinating ideas. He frowned and shook his head before he could stop himself. "Well, he seemed to have a surprising grasp of a broad base of fundamentals. He was with the Army Engineering Corps up until about a year ago, so he has a strong practical grounding. And he's studied extensively since we left Earth. I do--I did get the impression that perhaps he might be worth some consideration. But of course that's just an opinion.. "Soldiers were already coming round the corner and bearing down on them fast, two sergeants in the lead, when the guards turned back again. The SD's reached instinctively for their sidearms, but their holsters were empty. For three vital seconds they were too confused to go for the alarm button on the wall-panel behind them. Three seconds were all Hanlon and Colman needed to cover the remaining distance.. Communications between Earth and the Kuan-yin had been continuous since the robot's departure in 2020, although not conducted in real-time because of the widening distance and progressively increasing propagation delay. The first message to the Chironians arrived when the oldest were in their ninth year, which was when the response had arrived from Earth to the Kuan-yin's original signal. Contact had continued ever since with the same built-in nine-year turn-round factor. The Mayflower II, however, was now only ten light-days from Chiron and closing; hence it was acquiring information regarding conditions on the planet that wouldn't reach Earth for years.. "I've got one too," Veronica whispered, bringing her face.. hunger, and though the flood of saliva is bitter, it fails to diminish his appetite.. "I am a nice boy," he assures her. "My mother was always proud of me.. "And-thanks for the valves," Jay said. "They fit perfectly." "How's it coming along?" Micky didn't press for further details. She needed to know what came next, but she didn't entirely want.. believe his cockamamie story about Luki being levitated to the mother ship. The aliens sometimes abduct.. The house around her was another part of it. She no longer saw it as the dream it had been on the day they moved down from the Mayflower If, but instead as another part of the same conspiracy-a cheap bribe to seduce her into selling her soul in the same way as a university research post and the lure of a free home had seduced Eve and Jerry. Chiron didn't want to let her be. It wanted her to be like it. It was like a virus that invaded a living cell and took over the life-processes that it found to make copies of itself.. "Because the Book tells us we must.. "I've got a friend whose mother works most of her time there. Her name's Kathy." Merrick challenged.. Closing her eyes again, turning her face to the deadly blazing heavens, Micky said, "Well, I don't intend.. not paying for it--not a cent's worth of any of it." "They will," Rastus replied. "How?" Rastus looked mildly surprised. "They'll find a way," he said.. Celia looked down at the glass in her hand and bit nervously at her lip. "I don't know," was all she could whisper.

Sterm watched her impassively. In the end she shook her head. "No." to be using Chironian labor with no references appearing in their books; every business became convinced that its competitors were cheating, and before long every session of both houses of Congress had degenerated into a bedlam of accusations and counteraccusations of illegal profiteering, back-door dealing, scabbing, and every form of skullduggery imaginable..worldwide icon. "How old are you, kid?".A short hall, lined with imitation wood paneling, featured three doors. Two bedrooms and a closet..Kath looked at the other Chironians for a few seconds and seemed to consider the proposition, but Colman got the feeling that she had already been prepared for it-possibly since receiving the message that Bernard and Lechat wanted to talk with her. Then she moved over to a side table on which a portable compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat. A thin moustache pencil-lined his upper lip. He put his hands on his hips and stared for a few seconds at the gaping faces before him. "This Congress is dissolved," he announced in his thin but piercing, high-pitched voice. "The Mission is now under the direct command of the Military." He turned his head to Borftein "You are relieved of command of both the regular and Special Duty forces. Those functions are now transferred to me.".beyond the next door, he finds logic rewarded.
