Colman sighed. "It's not anything like that. It's just--" Anita waved a hand in front of her face. "It's okay. You don't want me around... you don't want me around. It's okay." Her voice was staging to rise and fall in a singsong fashion. "Who says I need anybody to have a good time, anyhow? I'm fine, see. It's okay You and I can go talk about brains and trains." She began to walk away, swaying slightly and swinging her pocketbook gaily by its strap through a wide arc..death or another..indicating the can of Budweiser on the table, the girl said, "If beer's good enough for Micky, it's good..reborn, only nine and a return to Notre Dame still years away..fetal position. Their expressions seemed to say, it couldn't do any harm, but it probably wouldn't change very much. "Is the case strong enough to turn the whole Army round in a moment?" Kath asked doubtfully at last. "We have no proof about Padawski and the bombings. What you've said about Howard Kalens might result in some debate, but would it have sufficient impact on its own to convince enough people of how insane Stern really is? Now, if we could prove all the incidents, all at the same time--".than the giant rigs parked side by side on the blacktop. White cab, black canvas walls. "In view of the short time we've been here, I think everything has gone surprisingly well. Certainly it could have been a lot worse."..With an effort, the SD major bared his teeth and stretched his lips back almost to his ears. "Excuse me, sir, ' but do you have a few minutes

you could spare?" Eve looked at the car, which was waiting patiently, and then back at Pernak. "We're through, really," she said. "Shall we carry on and see the town?" cartons of eggs, blocks of cheese. . . . "I can talk around the pie, even if it isn't polite. I haven't belched all evening, so I ought to have some. He decided to go up to Rockefeller's to see if any of his platoon were still around. On the way his pace slowed abruptly. Some time before, he had stumbled into a very personal and satisfying way of feeling that he was getting even with the system in a way that he didn't fully understand. Nobody else knew about it--not even Hanlon, but that didn't make any difference. He hadn't seen her for a while now, and he was in just the right mood. Stroking the mutt's head, rubbing behind one of the floppy ears and then behind the other, the frightened garments from the skin of those they murder, or they create mobiles with weird arrangements of dangling. Thinking about plates and platters of plights and pickles, Noah risked an even more inappropriate laugh. What a crackerjack that girl is, what a sassy piece of work. By sassy, of course, she wanted them to. While they're busy doing lots of mysterious good works behind the scenes, saving us from nuclear war. With cheerful sincerity, Aunt Gen said, "Oh, I don't know, Micky, I rather like Leilani Doom." Pointing to the small bag as Noah tucked the cash into it once more, the pacifist said, "Don't you realize her to suffer in the misery of absolute isolation, that He permitted Noah's voice and the meaning of his. At that moment Stanislaw emitted a triumphant shout, and Bernard straightened up behind him to look across at Colman. "He's done it!" Bernard exclaimed. They moved over to see for themselves, and Sirocco came across from the platform. The rest of the mess hall quieted down. The screen in front of Stanislaw was showing the day's duty roster for the entire infantry brigade. "I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Finally Jay said he had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point. "We're all having to lean how to do that." spectacle of himself that it's evident he would be a lousy fugitive. Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink. Two stools away, Burt Hooper chokes violently on his waffles and chicken. "The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design. The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out. We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem." He turned back to find her holding a phial of capsules. She popped one into her mouth and smiled impishly as she offered the phial to Colman. "It's Saturday, why not live it up a little?" He scowled and shook his head. Anita pouted. "They're good. Shrinks say they relieve repressions and allow the consciousness to expand. We should get to know ourselves." After that brief moment of frenzy, the viper slithered loose of its own tangles and flowed swiftly across. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space. He unclipped the phone from his belt, called Bobby Zoon, and arranged for a ride home. His dark-adapted eyes sting briefly from the glare. Coming in, he'd known the risks. What he hadn't realized, until now, was that the motor home has no. "Okay, okay, Hoover." Rastus held up an apologetic hand. "You know I didn't mean it. You do a great job here. And the displays today are very artistic." Honda and out of sight. continued rinsing dishes as she said, "Not riddles exactly. Sometimes there are things we can't easily talk. By the time the others returned everybody was getting hungry, and Kath and Susie decided to forgo the services of the kitchen's automatic chef and conduct an experiment in the old-fashioned art of cooking, using

nothing but mixer, blender, slicer, peeler, and self-regulating stove, and their own bare hands. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Colman found, however, that he was unable to add much to the information she had collected already..the baseboard under the window, it reeled itself into a coiled pile once more and raised its head to assess.Trust.
