After what seemed a long, long time, he saw a flicker of silver-white, and coming closer, he saw it was a unicorn. It stood in the little clearing, blinking. Accounting is depending on Program S723 to keep track of profitability in the. Dramatization is another. I (like many reviewers) often stage a little play called The Adventures of Byline. Byline (or "I") is the same species of creature as the Kindly Editor or the Good Doctor, who appear from time to time in these pages. That is, she is a form of shorthand. When Byline rewrites story X, that doesn't mean that I? the real, historical personage? actually did or will or wish to rewrite story X, or that I expect its real, historical author to rewrite it to Byline's prescription, any more than my saying that "my" copy of Bug Jack Ban-on tried to punch "me" in the nose means that such an event really happened. Pauline Kael's Movie Loon is another such fiction; these little creatures we send scurrying about the page are not our real, live selves, and their exploits are dictated more by the exigencies of our form than by a desire for personal glory. 244. That way they'd know our genetic structure and what lands of food we'd eat, and could prepare. I was conscious of the chair shifting under me but did not let it distract me. "Does that mean she's taking over?" "Se/eene, love," he said. "What a delightful surprise." "Look at it, Matt. Really look at it." So he did, feeling foolish, wondering what the joke was. He. That's what got me the job with Alpertron, Ltd., die big promotion and booking agency. I'm on the concert tour and work their stim board, me and my console over there on the side of the stage. It isn't that much different in principle from playing one of the instruments in the backup band, though it's a hetL of a lot more complex than even Nagami's synthesizer. It all sounds simple enough: my console is the critical link between performer and audience. Just one glorified feedback transceiver: pick up the empathic load from Jain, pipe it into the audience, they react and add their own load, and I feed it all back to the star. And then around again as I use the sixty stim tracks, each with separate controls to balance and augment and intensify. It can get pretty hairy, which is why not just anyone can do the job. It helps that I seem to have a natural resistance to the sideband stopover radiation from the empathic transmissions. "Ever think of teaching?" said the school voc counselor. "No," I said.
